## WAVECREST SELECTS JUNIFER SYSTEMS

WaveCrest, the global telecommunications carrier, has selected Junifer Systems to provide its leading interconnect and wholesale billing system. Junifer Telco CCB will support WaveCrest's worldwide business which includes Tesco's International Calling Card, a fully hosted (wholesale) service.

Chris Adams, CEO of WaveCrest said: "WaveCrest have seen spectacular growth in its hosted voice services business and we need a robust and flexible system that can cope with the large volumes of data that we process. Junifer Systems had the reputation, experience and high standards of customer service necessary for our business and Junifer Telco CCB was the ideal solution to support our continuing growth in this sector where our customers demand excellence."

Junifer Telco CCB provides the ability to manage interconnect agreement costs and revenues in a real-time basis. It processes every kind of traffic from voice to complex data and content services, providing visibility of profit margins. Junifer Interconnect/Wholesale has been designed to provide telco operators with a single solution that calculates both income/invoices and cost/statements in large volume wholesale interconnect environments.

Paul Fitzgerald, Sales & Marketing Director, Junifer Systems adds: "We offer a suite of products to meet the billing and customer care needs of both utility and telco operators. The Junifer system has the unique capability to charge calls at rates based on the total cost of the call – guaranteeing the operator a profit margin. It is the only system available on the market that allows operators the ability to create customer offerings based on a 'Cost Plus' model. We're delighted to be working with WaveCrest as it demonstrates our market-leading ability to deal with very large volumes of data and provide scaleable real-time billing which delivers genuine edge in a competitive market."

### **About WaveCrest**

WaveCrest is a global communications service provider offering wholesale and retail telephony services and solutions. WaveCrest operates a state-of-the-art, next generation network and provides services to many of the leading names in VoIP, MVNO and calling cards. Founded in 2001 and based in London, WaveCrest has operational activities throughout Europe and USA and is continuing to expand globally. With revenues of approximately £100M per annum, WaveCrest is one of the largest hosted telephony service providers in Europe. WaveCrest is a highly focused organisation with an aggressive and efficient product offering designed to deliver world-class voice services to the residential, pre-paid calling card and wholesaler carrier markets.
